Owners Manual

Walnut Creek Wood Mantel Shelf

By Modern Ember

Important Safety Instructions

Read and understand the entire manual before attempting to assemble, install, or operate the product.

⚠ WARNING

Heat clearances must be adhered to for installation of this product; adhere to your local building heat clearance codes and heat clearances as stated by the manufacturer of your specific firebox or stove model. Failure to do so will void the product warranty. Always consult a professional.

⚠ CAUTION

To avoid scratching the finish, assemble the product on a soft, non-abrasive surface such as carpet, thick bedding, or a large blanket.

⚠ CAUTION

Before assembly and installation, carefully unwrap all parts. Locate and set aside the hardware kit before disposing of the packaging.

⚠ CAUTION

Use care when assembling the product. Take your time and follow the instructions closely.

SAVE THESE INSTRUCTIONS FOR FUTURE USE.

Preparation

MOUNTING YOUR SHELF: A KEY CAUTION

To guarantee the strongest and safest hold, your shelf should always be anchored directly into a wall stud. If, for any reason, you need to mount it to drywall, specialized drywall anchors are essential for a secure fit.

INCLUDED

Shelf
French Cleat Mounting Board
Wood Screws

NOT INCLUDED

Pencil	**Tape Measure**
Level	**Stud Finder**
Drill	**Lag Bolts**
Concrete Anchors	

Installation Instructions

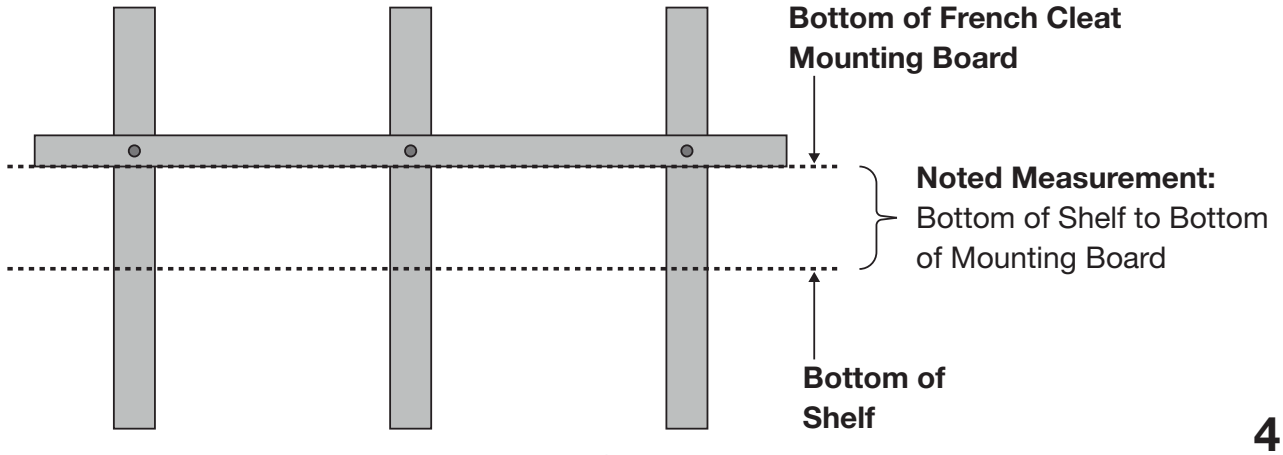

STEP 1: DETERMINE LOCATION AND MEASURE

With the shelf upside down on a soft surface, hold the French cleat mounting board in position on the mantel shelf. Measure from the bottom of the shelf to the bottom of the mounting board - make note of this measurement. **(See Fig. A)**

Next, place the shelf on the wall above your fireplace or on the wall at the desired height. Level the shelf and draw a line on the wall along the bottom of the shelf**.** Remove the shelf and measure up the distance between the bottom of the shelf and mounting board that you noted earlier. Mark the line at several points to ensure a level mount. **(See Fig. A)**

Locate and mark the location of the center of the studs (2x4 boards) inside the wall you intend to mount your mantel shelf. Ideally, 3 or more studs will be used. **(See Fig. A)**

FIG. A

STEP 2: ATTACH THE MOUNTING BOARD TO THE WALL

Place the included French cleat mounting board on the wall and line up the bottom of the French cleat mounting board with the upper line. Attach the mounting board to the wall with appropriate fasteners for your application.
(See Fig. B)

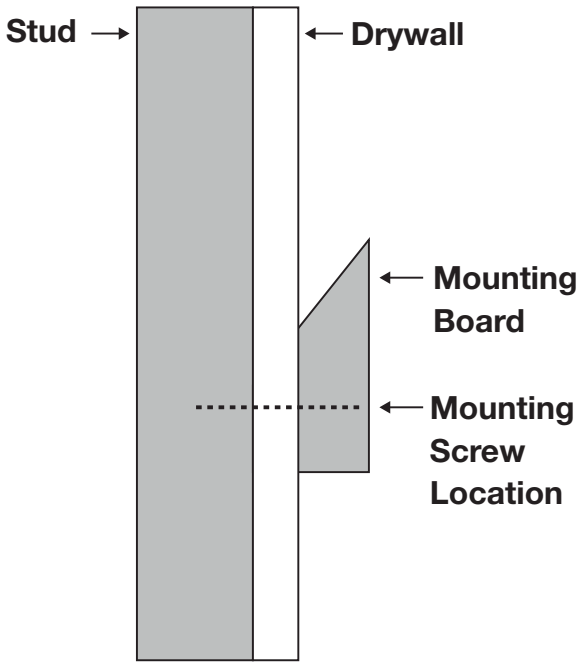

FIG. B

NOTE:

If you are mounting on a standard drywall over stud construction, make sure you screw the mounting board into the wood studs for strength. When attaching the shelf to a brick surface, you must use a masonry lag bolt.

STEP 3: MOUNTING THE MANTEL SHELF

Lift and place the shelf over the mounting board and slide down until the shelf is tight against the wall. Push the shelf tight against the wall and then push down firmly on the shelf to ensure the French cleat is properly connected.
(See Fig. C)

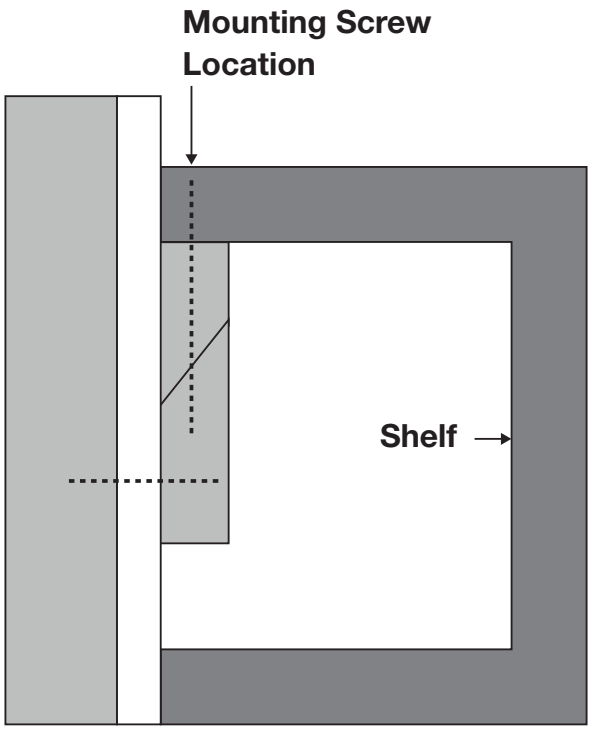

FIG. C

NOTE:

The edge of the shelf against the wall may not be tight against the wall across the whole length of the shelf. The wall may not be uniform and flat. If not, use caulk to fill the gap.

MODERN EMBER®

Thank you for your purchase.

Each unit has been manufactured to ensure safety and reliability. Before first use, read the instructions carefully and keep them for further reference.
